SUMMARY

Full-stack engineer with **3+ years** of building web and mobile products in TypeScript — React/Next.js and React Native on the front end, NestJS on the back. Owned end-to-end delivery for US clients, from feature work to iOS/Android release and CI/CD. **AWS Certified Cloud Practitioner; TOEIC 835/990.**

WORK EXPERIENCE

FPT Software

August 2025 - Current

Full Stack Engineer

Thu Duc, HCM

Bump Connect — US social platform serving **10,000+ users**

- Built and shipped **20+ production features** end-to-end across iOS, Android, and web (React Native, React, Node.js, TypeScript), including a custom camera, news feed, comments, real-time chat, and much more.
- Integrated Bluesky sign-in alongside Google and Apple, opening Bump to Bluesky's **45+ million accounts** through their existing logins.
- Owned iOS and Android build and release for over **8 months as the only team member**, producing signed builds even before CI/CD existed and shipping them to staging and production (TestFlight, App Store, Google Play Store) — ensuring uninterrupted client delivery.
- Became the **client's primary technical point of contact**, translating business requirements into shippable features and guiding technical decisions throughout the project.
- **Resolved 5+ App Store review rejections**, achieving successful approvals and preventing release delays.
- Configured CI/CD signing and secrets for both platforms using GitHub Actions — generated the App Store Connect API key, recovered a lost Android keystore, and resolved Android CI build failures for reliable automated builds.
- Onboarded and mentored teammates by authoring 7 mobile-development onboarding documents and step-by-step TestFlight guides, cutting new-member ramp-up time from about **1 week to 2–3 days**.

Cox Automotive (vAuto) — automotive retail platform serving **14,000+ US dealerships**

- Built and shipped features across **5+ independently deployed micro-frontends** in the unified vAuto platform, integrated as Web Components at runtime.
- Migrated **30+ legacy screens** onto the shared design system, using React, TypeScript, and Ant Design.

Fashion E-commerce Site (Contract)

January 2025 - July 2025

Full Stack Engineer

Thu Duc, HCM

- Led the development of the fashion e-commerce platform for a retail client, delivering a scalable solution using **React, TypeScript, NestJS, PostgreSQL and AWS**.
- Implemented **AWS Lambda** serverless functions for intensive photo upload and resize operations, reducing processing time by **37%** and improving user experience during product image uploads.
- Optimized application performance by implementing lazy loading, code splitting, and caching strategies, resulting in **60%** faster page load times.

MyYoutubeKaraoke Extension

June 2024 - November 2024

Software Engineer

Thu Duc, HCM

- Developed new features using React, TypeScript, and MUI, enhancing product functionality and improving the user experience.
- Partnered with a **Staff Software Engineer** to apply engineering best practices across code reviews, architecture, and delivery.
- Product: MyYoutubeKaraoke

FPT Software

September 2023 - April 2024

Software Engineer Intern

Thu Duc, HCM

- Adapted quickly to multiple roles (**Team Lead, Scrum Master, Frontend Engineer**) under mentor guidance, demonstrating flexibility and a growth-oriented mindset.
- Developed **40% of complex frontend features using React and TypeScript**, including multi-step forms, rich-text editors, and drag-and-drop interactions, significantly enhancing user experience.
- Facilitated all five core **Scrum events** (Sprint Planning, Daily Scrum, Sprint Review, Sprint Retrospective, and Sprint execution) with a **99% on-time delivery rate** and full alignment to **Agile** best practices.
- Reviewed and approved **200+ merge requests**, guaranteeing high code quality, consistent standards, and a maintainable codebase.
- Set up a CI/CD pipeline (**GitHub Actions**) automating build, test, and deploy.
- **Mentored 3+ team members** on React best practices and unit testing, leading to higher code quality, improved test coverage, and fewer production bugs.

EDUCATION

FPT University

September 2021 - June 2025

Bachelor of Software Engineering

- GPA: 3.4/4 | Recognized for outstanding academic performance **6 consecutive semesters**.
- **3+ years of team leadership experience**. Conducted hands-on coding sessions for students.

CERTIFICATIONS

- **TOEIC 835/990** (05/2025) - [Certificate](#)
- **AWS Certified Cloud Practitioner** (10/2024) - [Certificate](#)
- **Software Development Lifecycle** (08/2023) - [Certificate](#)

PROJECTS

Personal Trainer For You

Next.js | TypeScript | React Native | NestJS | SQL Server | AWS

- **Led a team of 4 engineers** to build a cross-platform website and mobile app connecting personal trainers with customers, enabling seamless service discovery and booking.
- Implemented a **real-time messaging system with WebSocket** for trainer–client communication.
- Built a **cron job** to automate attendance tracking, reducing manual effort by **80%** and increasing accuracy of session status updates by eliminating human error.
- Delivered push and in-app notifications, reducing missed training sessions.
- Designed the AWS architecture (**EC2, Amplify, RDS, S3, IAM**) for the platform.
- Integrated in-app camera uploads, securely storing **1,000+ progress photos on Amazon S3 with zero data-loss incidents**.
- Integrated secure payment processing via **VNPAY**, achieving a consistently high transaction success rate.
- Added easy English-Vietnamese language switching (i18n), making the app accessible to more users.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Java, SQL, HTML, CSS, C++.
- **Libraries/Frameworks:** Next.js, React, Micro-frontends, React Native, Jest, Socket.IO, Redux Toolkit, Zustand, React Query, TailwindCSS, Shadcn/ui, MUI, Ant Design, Spring Boot, NestJS, ExpressJS, Node.js, Prisma, Redis, DynamoDB, SQL Server, PostgreSQL, MongoDB, Docker, Kubernetes.
- **AI & Automation:** Cursor, GitHub Copilot, AI Workflow Automation, Prompt Engineering.
- **Developer Tools:** AWS, TestFlight (iOS) + Google Play (Android) distribution, Git, GitHub Actions, Postman, Jira.
